

UPLB: 100 Years

in the Science and Nature City

The UPLB Centennial Book...

... is a sumptuous documentation of UPLB's legacy and vision as it commemorates its own and the UP system's centennial this year. It also presents a vision of leadership and service for the next 100 years.

The articles are written by at least 50 authors, including deans and directors of UPLB's colleges and partner organizations, students and friends. The stories seek to capture the growth of UPLB from its pioneering days to its challenging present, and its contributions to the nation and the world in general. (*The Editors*)
